

60% NON-FOAMING ALGAECIDE SPEC SHEET

Pool Trol 60% Non-Foaming Algaecide is a broad spectrum algaecide, which prevents the growth of greenish free-floating varieties of algae and black algae that clings to the pool surfaces. This water soluble, cationic polymer absorbs on to pool surfaces to prevent attachment of algae growth. 60% Non-Foaming Algaecide is effective at both acid and alkaline pH and does not cause foam. It is compatible with the other chemicals used to treat pool water and can be used in pools treated with chlorine chemicals. Its use may generally reduce the chlorine demand of the pool. 60% Non-Foaming Algaecide will not interfere with the efficient operation of sand, diatomaceous earth (DE), or other commonly used types of filters. Regular use of 60% Non-Foaming Algaecide will overcome problems caused by algae, such as unsightly appearance, murky water, objectionable odors, clogged filters and increased chlorine demand.

COMPOSITION

Active Ingredients:

Poly [oxyethylene (dimethyliminio) ethylene (dimethyliminio)	
Ethylene dichloride.....	60%
Other Ingredients.....	40%
TOTAL	100%

PROPERTIES

pH (of 100 ppm in water).....	7.0
Weight per gallon.....	9.6

DIRECTIONS FOR USE

For maximum effectiveness, pools containing heavy growth of algae should be cleaned prior to adding 60% Non-Foaming Algaecide.

INITIAL TREATMENT: For pools having just visible algae growth, add an initial dose of 11 to 17 fl. oz. per 10,000 gallons of water and remove settled algae by cleaning. For treatment of freshly cleaned and filled pools, add initially 6 to 11 fl. oz. per 10,000 gallons of water.

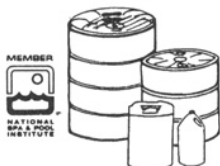

REGULAR TREATMENT: Subsequent additions of 2 to 4 fl. oz. per 10,000 gallons of water should be made every 5 or 7 days after initial treatment for maintaining the pool free of algae.

IMPORTANT: Do not mix 60% Non-Foaming Algaecide with concentrated dry or liquid chlorine products.
